OBJECTIVE

Results-driven Junior SEO with 1 year of hands-on experience optimizing WordPress and custom-built websites. Proven track record in solving keyword cannibalization, resolving technical indexing issues, conducting search intent-based keyword research, and driving measurable organic growth. Experienced in leveraging Google Search Console and technical SEO workflows to maximize search visibility, click-through rates, and sustainable traffic growth.

EXPERIENCE

Junior SEO | Golden Couponzz — Nov 2025 – Apr 2026 | Cairo, Egypt

Managed on-page and technical SEO strategies for a high-traffic coupon platform (WordPress), optimizing architecture following a major theme migration.

Scope of Work:

- Resolved keyword cannibalization issues post-theme migration using strategic canonical tags, 301 redirects, and content re-alignment.
- Conducted keyword research and search intent mapping using Google Keyword Planner, Ahrefs, Keyword Tool, and KWFinder.
- Extracted and analyzed search queries via Google Search Console to enrich existing pages and target emerging search terms.
- Enhanced content structure and headings (H1–H6) to boost E-E-A-T signals, answer intent, and capture AI-generated search visibility.
- Audited historical page titles using SpySERP and Internet Archive to implement high-converting title tag structures.
- Reviewed XML sitemaps and robots.txt configurations to enhance bot crawling and indexation efficiency.

> **Results Achieved (Last 3 Months vs Previous Period):**
> • Total Clicks: Increased from 44.5K to 69.2K (**+55.5% growth**) | • Total Impressions: Grew from 5.72M to 7.53M (**+31.6% growth**)
> • Average CTR: Improved from 0.8% to 0.9% | • Average Position: Enhanced from 9.4 to 8.6 in SERPs

Junior SEO | Coupoonat — Apr 2026 – Present | Cairo, Egypt

Led SEO operations across a custom-built coupon platform, collaborating directly with developers to resolve site-wide indexing delays.

Scope of Work:

- Executed comprehensive keyword research and competitor gap analysis using Semrush, Ahrefs, and Google Keyword Planner.
- Analyzed Google Search Console data to uncover commercial intent queries and optimize landing pages.
- Partnered with developers to engineer an internal linking widget system across the homepage, category, and regional landing pages.
- Accelerated the discovery and indexation of new URLs by funneling PageRank via strategic internal link placements.
- Monitored crawling status, handled redirect mapping (301/302), and resolved indexation barriers via robots.txt and sitemap audits.

> **Results Achieved:** Successfully reduced indexing latency for newly published pages through structured internal linking widgets and expanded topical coverage across regional landing pages.
